Friedman Fine Art is pleased to announce the completion of the art and graphic program for the Gift of Hope. This non-for-profit organ and tissue donor network is located in a newly constructed state of the art facility in Itasca, Illinois. The program took over a year to complete and consists of photography, custom paintings, wall murals and environmental & branding graphic applications.

The bulk of the facility was adorned with colored photographs mounted on acrylic float frames. The entire collection of over 75 pieces is an assortment of nature related imagery.

The collection consists of large panoramics and smaller series of complimenting imagery.

Timeline wall highlighting significant dates, events and milestones in Gift of Hope's history. Dimensional elements are printed on Sintra cleated over seamless printed canvas wall covering.

Process wall highlighting the steps in the donation procedure.

Donor wall highlighting the names of 2011's donors and recipients. The dimensional elements are fabricated with magnetic sheets on cleated Sintra for changeability.

The boardroom mission statement was fabricated using painted acrylic letters below a vinyl strip illustrating photos of donors and recipients.

The adjacent wall in the boardroom has donor and recipient photos mounted on acrylic that is pucked over a painted wall graphic.

Custom painted wall mural by Chicago artist Harry Sudman depicting graphic themes used throughout the art collection.

A series of cable hung printed plexi panels are used as room dividers.

Friedman Fine Art is pleased to announce the completion of the 9th floor art program for Mesirow Financial. Mesirow Financial is a leading financial services firm located at 321 North Clark St. The art program consists of 26 full color photographs mounted on float frames depicting images of Chicago and seven other cities in which this Mesirow Group has offices. The photographs selected for this project came from a collection of over 200,000 images on every conceivable subject.
